Let Us Strengthen Your Products

Through Partnership, Service And Expertise...

Scovill's experience of more than 200 years is a record of longevity of which we are proud. Our reputation has been built upon our capability to provide a broad range of quality fasteners, as well as the attaching machines, service and support that go with them.

From product design and sample development, to product testing, ordering and delivery, as well as product application and technical support, our understanding of the needs of our Apparel and Industrial customers makes Scovill Fasteners a strong and reliable partner.

Our main product lines are manufactured in the US at our global headquarters in Clarkesville, Georgia. We also maintain an extensive supply chain to ensure we meet the unique needs of our customers around the world. Our staff includes engineers and tooling technicians who utilize advanced systems and processes to ensure products maintain a high level of quality.

Scovill's global presence enables our sales team and service technicians to provide a comprehensive offering of products and support. Our flexible decision-making process, dedicated account-based customer service team and efficient global ordering processes, make doing business with Scovill easy.

Fasten Your Products To Our History And Experience...

Every product is the sum of its parts. If something as important as a fastener fails, product performance suffers. As one of the world's largest manufacturers of Apparel and light Industrial fasteners, Scovill produces high-performance products utilized throughout a multitude of industries. You'll find our fasteners on a variety of applications such as clothing, footwear, medical devices, boating products and military equipment.

Scovill's history began in 1802 and includes many "firsts" such as the development of gilt buttons in the United States and the invention of new brass-making methods. Scovill fasteners also adorned the suits of astronauts at the first moon landing in 1969. Today, our fastener products are important to the customers who rely on us to enhance the design and function of their products, and ensure the highest quality and durability. Our longevity among manufacturers around the world is something we never take for granted.

*Global Sales and Technical Service • Custom Design and Sampling
Reliable Delivery • History of more than 200 years*

When you work with Scovill Fasteners, you're not just buying a product, you're gaining a full range of service and support in a collaborative relationship from which all great designs are made. Our commitment to service enables us to maintain long-term customer relationships and encompasses the technical expertise necessary for appropriate product selection. Our superior ability to track orders globally from inception to delivery, quicker lead times and a focus on continuous improvement and operational efficiency has provided Scovill recognition as a reputable and reliable supplier.

Our sales team, technicians and service specialists are located around the world to support customers throughout the Americas, Asia-Pacific, Europe and everywhere in between. You can depend upon our highly trained staff to partner with you for prompt solutions to complex issues. Customer service is unsurpassed through our global presence and ability to respond where you need us....when you need us.

Valuable Services That Support Your Products And Provide Customer-Centered Solutions...

Technical Support and Field Service

Our experienced staff of field service technicians and specialists provide support to customers around the world. Our collaboration with customers allows us to recommend the most appropriate fasteners and attaching machines for specific applications. Scovill's service team also provides technical training for operators at customer production facilities. Equipment professionals at our global headquarters in the US recondition existing equipment and build new machines. Our focus on technical expertise results in machines and tooling that perform to the highest standards.

Fastener Application Lab

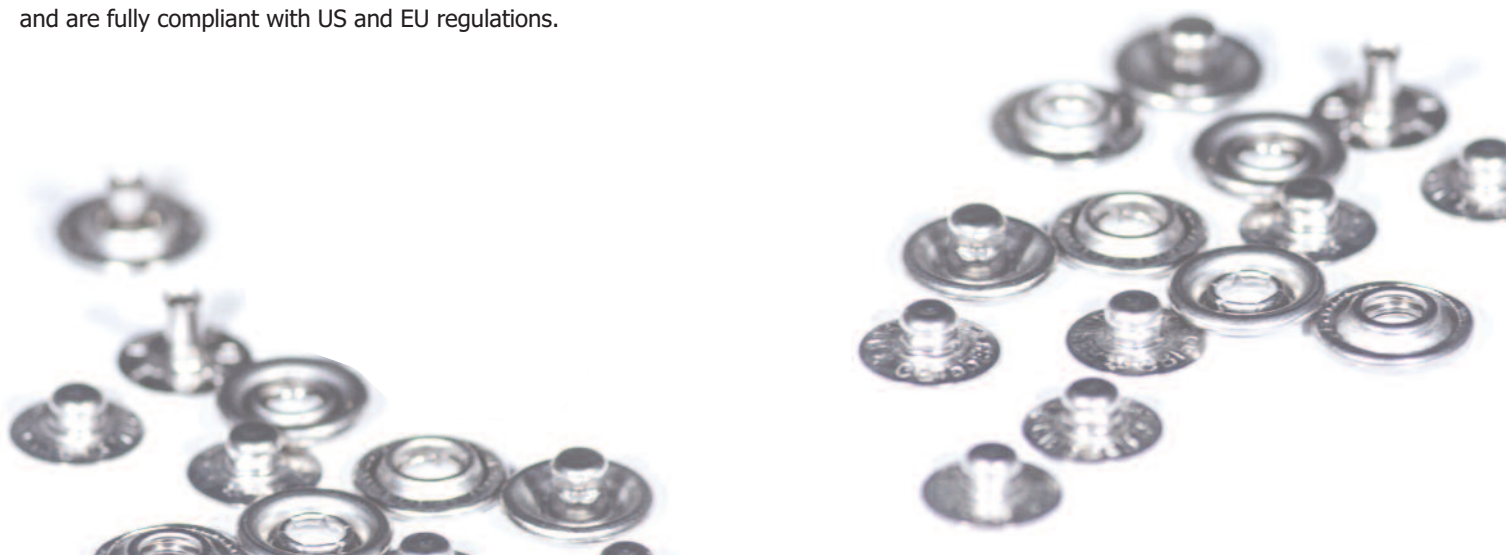

Global technicians and specialists use advanced equipment to perform prototype evaluations and ensure fasteners perform to stringent standards including attached component separation strength and snap action. Our Piece of Mind Attaching System (PMAS) offers Garment Check Reports and Press Fastener Data Sheets that provide details on recommended products and foundation thicknesses for all fastener applications. Our approach to fastening solutions includes collaboration with customers and extensive application analysis capabilities.

Sample Development Lab and Design Team

Our product design specialists transform ideas and concepts into functional fasteners. Prototypes and samples are efficiently developed to allow customers to meet critical project timelines. Whether it's developing new products or adapting existing ones for a specific application, our superior service is crucial. Product development technicians, Sample Development Lab staff and tooling technicians work together to enhance our customers' products.

Quality Assurance

Quality means more than just a well-made fastener. It means each fastener has met the most rigorous testing and quality control measures. At Scovill, quality also means safety, consistency and performance. We set the standard in these areas, and have gone beyond, through our comprehensive and fully-equipped Quality Assurance Lab. Scovill products meet and often exceed regulatory standards to ensure durability and are fully compliant with US and EU regulations.

Products That Provide Superior Durability And Reliability...

Apparel

Our customers appreciate the hundreds of finishes, colors and styles that may be customized to meet their specific needs. Whether it's fashionable ski jackets, baby clothes or medical gowns, our products perform safely and reliably. Duramark® Tack Buttons and Burrs are a vital part of our broad Jeanswear product offering that enhances denim's dual reputation for style and durability. Encompassing both the Infantwear and Workwear markets, our Gripper® Snap Fasteners have been an industry leader for more than 75 years. Extensive trim resources are also available including zippers, sew-on buttons, plastic snaps and hook and bar. Our products meet and often exceed US and EU regulations.

Industrial

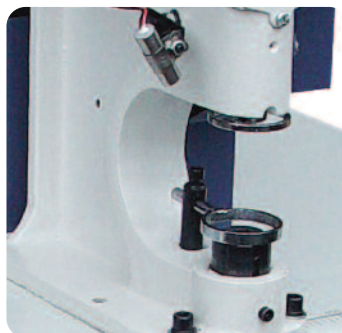

Our products are manufactured to specifications that support applications where dimensional integrity, performance, consistency and durability are crucial. Scovill's DOT® products have been the closures of choice for more than 100 years. These fasteners are used on applications in the Military, Marine, Sporting Goods, Automotive, Aviation and Industrial Safety industries, as well as on products such as tents and awnings, packaging and leather goods. Customers utilize our industrial snap fasteners, turn buttons, grommets and washers to provide strength and heavy-duty wear in harsh conditions. Our DOT products conform to stringent US Military and Commercial specifications.

Attaching Machines

Our broad range of attaching equipment offers reliability, operator safety and speed. This product offering provides automatic, semi-automatic or manual attaching machines, assorted tooling and various accessories such as hoppers and target lighting. Attaching machines are designed and assembled at our global headquarters in the US with additional options supplied around the world. Wherever our customers are, our staff of technicians and specialists make installation, training and maintenance convenient and cost-effective.

Custom Metal Stamping

Our precision custom stamping capabilities provide full service product and tooling design. The custom stamping staff includes design and industrial engineers, skilled tool makers and setters and quality control technicians that are committed to meeting specific customer needs. These skilled professionals work to ensure design specifications are met to support industries that require products such as battery components, lighting instrument elements, diagnostic studs, industrial clips and various other customized specialty fasteners.

Great Designs Deserve Great Fasteners.

Scovill Fasteners develops and manufactures a diverse range of high-performance fasteners for our apparel and industrial partners. Our customer-focused capabilities and global collaboration provide the highest level of service - from fastener design and delivery to application.
